

Gaming Speakers 40W

Premium Sound Configuration for Gaming

In the midst of your gaming world lies an incredible auditory journey. Unity speakers are the guide through this adventure. Game audio is distinct from home theater or any other audio types, and your speaker system must be attuned to this world. No warrior steps onto the field of combat without a weapon of resonance. Unity prolongs optimal sounds long after your game is finished. Configured specifically for gaming environments, you'll encounter crystal clear high frequencies and rich throaty bass sounds with lessened distortion. This is the sound of gaming come to life.

Independent Bass Adjustment

Every great game is designed with its own unique audio environment. What you need is the flexibility to bring big balanced sound for each and every one of your gaming journeys. Unity speakers allow you to adjust bass to fit your preferred acoustic sound. Enhance the experience further by plugging in your headphones for a deeper tactical advantage or the high resolution gaming microphone for a crisp voice chat. Unity is your personalized audio environment.

Multiple Inputs and Headphone Output Jack

Precise control is the key to every victory. Unity delivers with a centralized control console wherever you need it. The multifunctional console gives you power, volume and bass adjustments at a finger's reach. Your A/V gear isn't left out, the console includes RCA and 3.5 mm auxiliary jacks so you can shape your audio environment. Wherever your game takes you, you are in control.

Wall-Mountable Satellites

Imagine the roar of cannons as they push across the field of battle. Wherever they are needed, the thunder is there. This is the strength of design behind the Unity speakers. Shelf-mounted or wall-mounted, the solid base and built-in keyhole can accommodate optimal location setups. With the added extended cable (1.8M), you can position your satellites to win the battle for sonic clarity.

Scenario

Gunshots

Footsteps

Orientation Sounds

Fighting Sounds

Explosion Sounds

Specifications
